

## MEASUREMENT GUIDE

**Girth** – Girth is the most important measurement when determining size! To measure girth, place a tape measure at the top of the shoulder where a leotard strap sits, then down through the crotch and back to the same shoulder. Measuring tape should be close to the body but not tight.

**Bust/Chest** – Measure over the fullest part of your chest with your arms relaxed at your sides.

**Waist** – Measure around where your waist naturally indents. Keep your finger between the tape and your belly.

**Hips** – Measure around the fullest part of the hips and buttocks while standing with your heels together.
